

Incandescent

### POWERBALL® HCI®

This revolutionary ceramic metal halide lamp has a round rather than cylindrical arc tube. Due to this patented technology this perfect ball of light ensures improved colour performance, best colour rendering and excellent colour stability when compared to conventional ceramic lamps. Interchangeable with most quartz and ceramic metal halide lamps this lamp is the premier choice from our complete range of metal halide lamps.

### POWERBALL® SHOPLIGHT HCI®

Using OSRAM POWERBALL® technology this unique lamp has outstanding colour rendering particularly at the red end of the spectrum making it ideal for retail shoplighting or where red colour rendering is important. Interchangeable with high pressure discharge lamps that have T or TC bases.

SHOPLIGHT

### POWERSTAR® HQI®

Quartz arc tube technology provides intense light and excellent colour rendering. This impressive range is available in three basic bulb shapes and four light colours from 70 to 2000W. They provide outstanding economy and longlife making them ideal for use in floodlighting, standard shop lighting and industrial lighting.

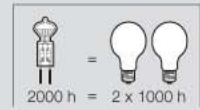

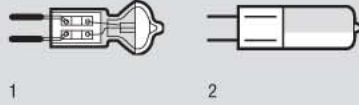

### VIALOX® NAV® SUPER 4Y (SON PLUS 4Y)

Maintenance of amenity and street lighting will benefit from using the longer service life VIALOX® NAV® SUPER 4Y (SON PLUS 4Y) high-pressure sodium lamps. 4Y stands for 4 YEARS or 16,000 hour service life. Combined with a special BREHA® vibration resistant support patented by OSRAM this also ensures that they have superior vibration resistance allowing for optimized mounting. An excellent light source for street and amenity lighting.
